|---|---|
| Discipline | **MTB** |
| Size | **30 mm** |
| Product type | **Valves** |
| Case quantity | **12** |
| Range | **Sealant, Tape & Valves** |

## Description

Featuring a cutting-edge, integrated ball valve system, the valve ensures lightning-fast air flow , turbocharging the sealant filling process . Say goodbye to the hassle of traditional tubeless valves that clog up and require the valve core to be removed to fill sealant and achieve sufficient air flow during tubeless set up. Our Big Bore Hybrid offers up to 2 54 % higher air flow than traditional Presta valves thanks to the straight through bore design. With our ball valve construction and integrated lever , you can quickly open and close the valve for effortless a irflow control , and even fine tun e your pressure whilst you're out riding. Crafted from 7075 aircraft grade CNC machined aluminium construction with a stainless steel ball valve , this fully serviceable valve is built to withstand the toughest ride s, whatever the conditions.
